Laugh Lines.....

Frank was setting up a sundial in his yard when a neighbor asked, "What's that for?" Frank stopped to explain, "The sun hits that small triangular spike and casts a shadow on the face of the sundial. Then, as the sun moves across the sky, the shadow also moves across the calibrated dial, enabling a person to determine the correct time." The neighbor shook his head. "What will they think of next?"

Fire swept the plains and burned down the farmer's barn. While he surveyed the wreckage, his wife called the insurance company and asked them to send a check for \$50,000, the amount of insurance on the barn. "We don't give you the money," a company official explained. "We replace the barn and all the equipment in it." "In that case," replied the wife, "cancel the policy I have on my husband."

What an automated society we live in. Have you noticed that when a traffic light turns green, it automatically activates the horn of the car behind you?
